

Agility in On-Demand
Product Development

SaaS Product Development

Engagement Model

Assumptions

- Basic Engagement Framework
 - Actual engagements are planned to meet client needs
 - Based on Agile methodology
- Assumes a New Product
 - Full product development cycle
 - Each element of the cycle can stand alone as an engagement

Agile Engagement Model

- Scio can be engaged at any phase to assist with your software product, whether for a new or an existing product
- Scio typically creates teams of 5-9 remote resources to work jointly with you in real-time

SaaS Strategy Session

- Optional, can be folded into Sprint 0
- Typically includes onsite at Scio or Client location
- One Week Duration
- Includes Reviews and Recommendations for:
 - Business Model
 - Product Strategy
 - Technical Architecture
 - SaaS Operations
- Sprint 0 Scope Recommendations

SaaS Strategy Session

Sprint 0

- Depth & Duration Determined in Strategy Session, Typically 2-3 Weeks
- Includes
 - User Experience Design
 - Technical Design
 - Product Roadmap
 - User Story Analysis & Prioritized Backlog
 - Sprint 1 Detailed Analysis & Task Breakdown
 - Effort, Phase Breakdown & Cost Estimates

Sprint 1 to N

- 2 Week Sprints (1-n)
- Full Agile Team
 - Project Manager, Scrum Master, Product Owner, Technical Architect, Developer(s), Designer(s) & Quality Assurance
- Test Driven Development & QA
- Analysis & Planning for Next Iteration
- On-going Collaboration w/Client Team to Control Effort, Scope & Goals
- Generally 3-6 month scope box for first release

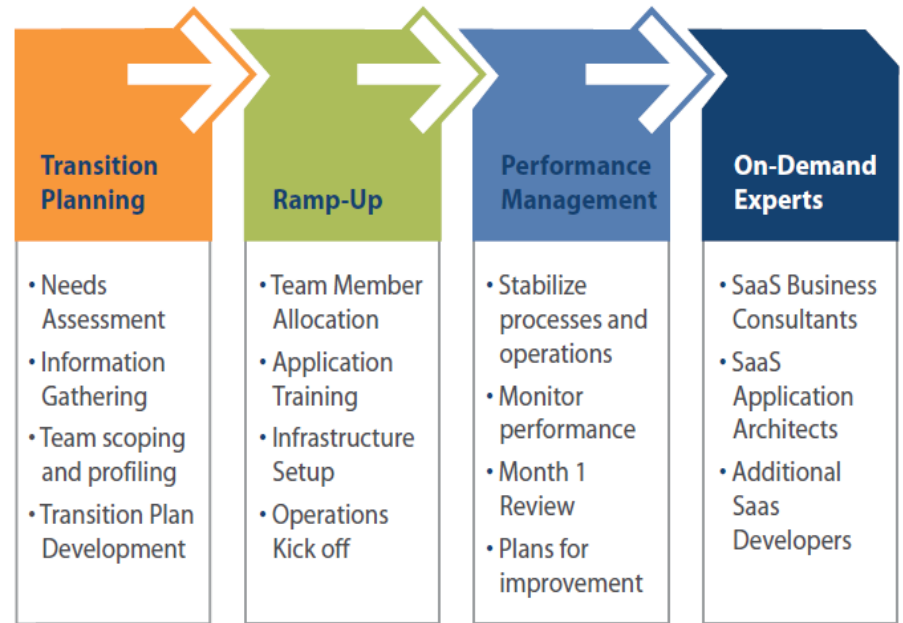

Beta/Launch

- Product Environment Shakedown
- Full Regression Testing
- Optional Beta
- Go-live Support
- Rapid Issue Response

Ongoing Operations & Enhancements

- Dedicated Team
 - Application Maintenance
 - Continuous Enhancements
- Customer Support
- Infrastructure Management
- Performance Tuning

Why Scio?

- Our Approach
 - Early Delivery of Viable Product & Cash Flow for Client
 - Proven Platforms & Frameworks to Lower Effort & Allow Value Focus
 - Collaborative, Partnership Engagement Model
